EDUCATION	Ph.D. in Computer Science Brown University Advisor: Prof. Nikos Vasilakis	Aug. 2025–now
	B.Sc., M.Eng. in Electrical and Computer Engineering University of Patras Advisor: Prof. Christos Fidas Thesis: <i>A Framework for Applying Answer Set Programming in Games</i>	Oct. 2018–July 2023
INDUSTRY POSITIONS	Software Engineer Demant A/S Worked on firmware and systems software; developed (i) a static analysis tool for ignored error codes, (ii) a custom error-handling framework integrated across 600k+ lines of kernel and driver code, and (iii) fixes for 100+ bugs, including a major firmware defect.	Sept. 2023–Aug. 2024 Copenhagen CR, Denmark
	Software Engineer (Erasmus+ Placement) Bionos Biotech S.L Worked on computational pipelines for metabolomics and gene-expression analysis; developed (i) a Python/Selenium/Bash tool to extract and group animal and plant species by metabolite profiles, and (ii) R and Python utilities to automate downstream gene-expression analysis.	June 2022–Aug. 2022 Valencia, Spain
HONORS & AWARDS	OSDI '26 Jay Lepreau Best Paper Award Awarded for [C3].	July 2026
	OSDI '26 Distinguished Artifact Award Awarded for [C3].	July 2026
	OSDI '26 Best Paper Award Nominee Awarded for [C4].	July 2026
	USENIX ATC'25 Best Paper Award Awarded for [C5].	July 2025
	Urbis Assembly Hackathon, Honorable Mention Created a meta search engine for the Urbis platform. [press]	Nov. 2023
	Huawei “Seeds for the Future” Scholarship Awarded for my teaching contribution to the University of Patras ECE department.	June 2023
	IEEE Xtreme 16.0 Competition Placed globally at the top 4% among 6373 teams.	Oct. 2022
	Student/Travel Grants: USENIX ATC'25, ACM SOSP'25, USENIX OSDI'26	2025–2026

SELECTED PUBLICATIONS ^m student under my direct mentorship, ^{*} equal contribution, ^{αβ} alphabetical order.

Peer-reviewed Publications

- C1. “Ahead-of-time Analysis of Shell Program Effects”. Lukas Lazarek, **Evangelos Lamprou**, George Kapetanakis^m, Eric Zhao, Zhiwen Zheng^m, Michael Greenberg, Konstantinos Kallas, Nikos Vasilakis. **SOSP '26**. [code]
- C2. “Incr: Faster Re-execution via Bolt-on Incrementalization”. Yizheng Xie^{*}, **Evangelos Lamprou**^{*}, Jerry Xia^m, Nikos Vasilakis. **OSDI '26**. [code]
- C3. “Controlling Opaque-Component Effects with Semisolates and Try”. **Evangelos Lamprou**^{*}, Tianyu (Ezri) Zhu^{*}, Di Jin, Grigoris Ntousakis, Georgios Liargkovas, Calvin Eng, Konstantinos Kallas, Michael Greenberg, Nikos Vasilakis. **OSDI '26**. [code] [web]

- C4. “RT: Regular Types for the Streaming Shell”. Zekai Li, Lukas Lazarek, **Evangelos Lamprou**, George Kapetanakis, Konstantinos Mamouras, Nikos Vasilakis. **OSDI ’26**. [\[code\]](#)
- C5. “The Koala Benchmarks for the Shell: Characterization and Implications”. **Evangelos Lamprou**, Ethan Williams^m, Georgios Kaoukis^m, Zhuoxuan Zhang^m, Michael Greenberg, Konstantinos Kallas, Lukas Lazarek, Nikos Vasilakis. **ATC ’25**. [\[code\]](#) [\[web\]](#) *Extended version* to appear in ACM TOCS per recommendation of the ATC’25 Chairs.
- C6. “Guarding LLM-aided Software Transformation Tasks via Component Exoskeletons”. **Evangelos Lamprou**, Christian Gram Kalhauge, Martin C. Rinard, Nikos Vasilakis. **PACMI ’25 @ SOSP ’25**
- C7. “From Ahead-of- to Just-in-Time and Back Again: Static Analysis for Unix Shell Programs”. Lukas Lazarek, Seong-Heon Jung ^{$\alpha\beta$} , **Evangelos Lamprou** ^{$\alpha\beta$} , Zekai Li ^{$\alpha\beta$} , Anirudh Narsipur ^{$\alpha\beta$} , Eric Zhao ^{$\alpha\beta$} , Michael Greenberg, Konstantinos Kallas, Konstantinos Mamouras, Nikos Vasilakis. **HotOS ’25**. [\[press1\]](#) [\[press2\]](#)
- C8. “Investigating Applicability Heuristics of Answer Set Programming in Game Development: Use Cases and Empirical Study”. **Evangelos Lamprou**, Christos Fidas. **ACM CHI Greece ’23**. [\[code\]](#)

Preprints

- P1. “Caruca: Effective and Efficient Specification Mining for Opaque Software Components”. **Evangelos Lamprou**, Seong-Heon Jung, Mayank Keoliya, Lukas Lazarek, Konstantinos Kallas, Michael Greenberg, Nikos Vasilakis. **arXiv 2510.14279**
- P2. “Lexo: Eliminating Stealthy Supply-Chain Attacks via LLM-Assisted Program Re-generation”. **Evangelos Lamprou**, Julian Dai^m, Grigoris Ntousakis, Martin C. Rinard, Nikos Vasilakis. **arXiv 2510.14522**

TALKS & TUTORIALS

Research Talks

- 1. Incr: Faster Re-execution via Bolt-on Incrementalization
[NJPLS](#), University of Pennsylvania May 2026, Philadelphia, PA, USA
- 2. Effective and Efficient Specification Mining for Opaque Software Components
[NESD](#), Harvard University Jan. 2026, Boston, MA, USA
[NEPLS](#), Boston University Nov. 2025, Boston, MA, USA

Tutorials

- 1. [Analyzing Shell Scripts](#)
POPL 2026 [\[video\]](#) [\[material\]](#) Jan. 2026, Rennes, France
Co-taught with Michael Greenberg, Konstantinos Kallas, and Nikos Vasilakis

TEACHING

Graduate Teaching Assistant Spring 2026
Brown University Providence, RI, USA
[Distributed Systems](#) (CS1380/1385/2380) Undergraduate & Graduate level; enrollment: 63
Instructor: Prof. Nikos Vasilakis
Developed seven milestones guiding students through implementing a distributed search engine on top of a distribution-oblivious language runtime. [\[material\]](#)

Teaching Assistant & Shepherd Fall 2024; Fall 2025
Brown University Providence, RI, USA
[Systems Transforming Systems](#) (CS2952R) Graduate level; avg. enrollment: 25
Instructor: Prof. Nikos Vasilakis
Shepherded undergraduate and graduate students through an intense semester-long research project; (i) work led to submissions to ATC’25 (C5.), OSDI’26 (C2.), and SOSP’26 (C1.); (ii) gave lectures on benchmarking methodologies and principled use of language models in academic writing.

Teaching Assistant Fall 2022; Fall 2023
University of Patras Patras, Greece
[Operating Systems](#) (ECE CK702) Graduate level; avg. enrollment: 141
Instructor: Prof. Christos Fidas
Created assignments on *Linux Kernel Modules* and the *xv6* kernel; these exercises were integrated into the course curriculum. [\[material\]](#)

SERVICE	Webmaster Brown Systems Group	Aug. 2025–now Providence, RI
	Organizer Brown Systems Week	Jun. 2026 Providence, RI
	Web & publication co-chair 18th European Workshop on Systems Security (EuroSec 2025)	March 2025 Rotterdam, Netherlands
	Web & publication co-chair 17th European Workshop on Systems Security (EuroSec 2024)	April 2024 Athens, Greece
SELECTED PROJECTS	%seax Search Engine	Oct. 2023
	Urbit Assembly Hackathon entry Developed a meta search engine for the Urbit network using the <i>Hoon</i> programming language; received honorable mention. [code] [web]	
	ScummVM Open source contribution Developed a generic parser providing a more robust interface for handling MCI (Media Control Interface) commands inside the <i>Director</i> game engine. [code]	Feb. 2023
	Gauzarbeit Personal project Developed an online sandbox game with heavy modding support; implemented scriptable entities within an infinite world simulation over a telnet-based interface. [code]	2021–now
